INSTALLING CU SYSTEM READY

MAC OS

After downloading and attempting to install CU System Ready, you may see a window that says "CU System Ready" can't be opened because it is from an unidentified developer".

Follow the steps below to install the application

1. Click OK
2. Open System Preferences
3. Click Security and Privacy
4. Click Open Anyway
5. When prompted, enter your computer credentials
6. CU System Ready will begin to install
